SUMMARY

Full Stack Developer with practical experience in the MERN stack. Leveraged skills and gained valuable insights through internships, contributing to real-world projects. Eager to bring my passion for coding and problem-solving to a dynamic team.

EDUCATION

Parul University, India

- Btech in Computer Science and Engineering

Pravin Patil College of Diploma Engineering and Technology, India

- Diploma in Information Technology

Dec 2021 - May 2024

CGPA – 6.5/10

Aug 2018 - Aug 2021

CGPA – 8.2/10.00

TECHNICAL SKILLS

Programming Language: JavaScript, C, C++, Java

Web Technologies: ReactJS, Adonis.js, Node.js, Express.js, HTML, CSS, JavaScript ES6, REST APIs, Apache, Web Sockets, TypeScript, Redux, TailwindCSS, MaterialUI, MicroService Architecture, POSTMAN, JWT, Payment Gateway, OAuth

Database / other: MongoDB, Mongoose, MySQL, Redis, ORM, MongoDB aggregation pipeline, Docker

WORK EXPERIENCE

MERN Stack Full-Stack Developer, Silicon Leaf Corporation, India

February 2025 – Present

- Developing and maintaining dynamic, high-performance web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js).
- Collaborating with cross-functional teams to deliver scalable and user-friendly solutions tailored to client requirements.
- Implement RESTful APIs, optimizing performance, and ensuring seamless integration between front-end and back-end components.
- Actively contributing to code reviews, feature enhancements, and deployment processes to maintain best development practices.

Web Developer, sBizzl TECHNOLOGIES PRIVATE LIMITED, India

June 2023 - Sep 2023

- Contributed to projects at sbizzl, showcasing expertise in React.js and Node.js within the MERN stack.
- Successfully developed applications with a focus on building robust and scalable solutions, demonstrating proficiency in both front-end (React.js) and back-end (Node.js) technologies.
- Significantly contributed to leveraging the MERN stack for the creation of responsive applications, showcasing a well-rounded skill set in full-stack development.

PROJECTS

Code Sync | Realtime Code Editor

Jan 2024 – Feb 2024

- Engineered a real-time collaborative code editor using MERN stack and socket.io, facilitating simultaneous coding for multiple users in a shared virtual room; enhanced team productivity and communication with seamless real-time updates to the shared codebase.
- Implemented **CodeMirror** to decorate and improve code readability within the Real-time Code Editor. This feature-rich text editor provides syntax highlighting, ensuring an aesthetically pleasing and efficient coding environment for all users in the collaborative room.

WatchIT

Feb 2024 - Present

- Crafted "**watchIT**," an interactive video-sharing platform with the MERN stack (**MongoDB, Express.js, React, Node.js**). Users can effortlessly upload and watch videos from various channels, engage with content through comments and likes, and explore a dedicated section to view their liked videos.
 - Introduced Engineered a user-centric tweet section on watchIT, utilizing MongoDB aggregation pipelines to streamline data retrieval and user-specific content display, resulting in a 50% improvement in the overall user experience and platform usability.

Ecommerce

Apr 2023 - May 2023

- Spearheaded the development of an end-to-end e-commerce solution, "**ecommerce**" utilizing the **MERN stack** with **Redux** for efficient state management.
- Users can effortlessly browse, purchase, and interact with products, including posting comments and rating items on a 5-star scale. An intuitive **admin panel** provides seamless management of stock, orders, and shipping details.
- Integrated **Razorpay payment gateway** for secure card transactions
