PROFESSIONAL SUMMARY

Business Operations professional with 3+ years of corporate experience at Physics Wallah, managing CRM, ERP, LMS, telephony workflows, lead operations, dashboards, and large operational datasets. Experienced in lead audits, identifying and reducing process leakage, data validation, SOP creation, system troubleshooting, reporting, and process improvement. Skilled in working with cross-functional stakeholders, improving operational workflows, and driving efficiency through data-driven insights and automation.

WORK EXPERIENCE

Physics Wallah Limited

AUG 2022 - PRESENT

Senior Associate , Business Operations (CA Offline)

| Sep 2024 – Present

- Manage end-to-end CRM, ERP, LMS, batch operations, and backend system workflows across multiple offline centres, handling structured student and operational data for 20,000+ records while ensuring data accuracy, timely execution, system continuity, and seamless student access.
- Conduct regular lead allocation and movement audits, identifying lead leakage, follow-up gaps, duplicate or incorrect records, and process deviations; implement corrective actions to improve lead-flow accuracy, process compliance, and operational efficiency.
- Build, maintain, and validate operational dashboards, trackers, and weekly business reports using Google Sheets, Excel, and Power BI, enabling management and stakeholders to monitor performance, data accuracy, pending actions, and operational trends.
- Administer backend systems including Pen-Pencil Admin, supporting 5 examination categories across offline PW centres while ensuring data quality, frontend sanity checks, smooth execution, and timely resolution of system-related issues.
- Create and maintain SOPs, workflow documentation, audit checklists, trackers, and process controls to standardize operational execution, improve user adoption, minimize process leakage, and reduce manual errors.
- Act as a key data and operations point of contact between centres, central teams, and cross-functional stakeholders, providing structured student and business data and ensuring effective coordination across operational activities.
- Partner with centre teams and internal stakeholders to understand business requirements and operational challenges, translating them into structured data solutions, reports, and process improvements that support faster and more informed decision-making.
- Coordinate with sales, counselling, marketing, academics, technical teams, business teams, and external vendors for system integrations, telephony/call-flow issues, troubleshooting, enhancements, escalations, and operational rollouts.
- Identify operational bottlenecks and process gaps and implement improvements through automation, tracking mechanisms, reporting enhancements, and workflow optimization, enabling faster reporting, better coordination, and more efficient centre operations.

Associate , Student Success Team

| April 2023 – Sep 2024

- Managed CRM and Google Sheets-based tracking for student queries, follow-ups, escalations, issue status, and resolution metrics, ensuring timely closure and accurate reporting to stakeholders.
- Monitored PW App and LMS operations, including live classes, notes, content availability, and student access, while coordinating with technical teams to troubleshoot platform issues and maintain service continuity.
- Analyzed recurring student issues and user feedback, identified process gaps, and supported improvements that enhanced issue-resolution efficiency, platform experience, and overall student satisfaction.
- Worked closely with internal and cross-functional teams to manage escalations, communicate operational issues, and ensure smooth execution of student-support processes.

Intern, Business Operations (Central Results)

| Aug 2022 – April 2023

- Mentored high-potential students and provided structured academic guidance, contributing to students achieving All India Ranks in Olympiad examinations.
- Conducted interactive sessions to understand student challenges, provide targeted guidance, and support effective preparation and overall academic improvement.
- Analyzed student performance data in Google Sheets, identified performance trends, and shared actionable insights with stakeholders to support student improvement and academic decision-making.

EDUCATION

IIT Guwahati

Bachelor of Science (Hons.) in Data Science and Artificial Intelligence - 8/10 2025

Saras AI Institute, Utah, USA

Associate of Science in Artificial Intelligence - 3.5/4 2026

Central Board Of Secondary Education

Higher Secondary Education (PCM with Python) - 90% 2021

Secondary Education - 92% 2019

Skills

Operations & Systems: CRM Management, ERP Operations, LMS Operations, Lead Flow Management, Lead Audits & Leakage Control, Telephony/Call Tracking, SOP & Process Documentation, Data Audits, Process Compliance, Issue Management

Analytics & Tools: Google Sheets, MS Excel, Power BI, SQL, Python, MS Office, Dashboards & Reporting

Core Skills: Analytical Problem Solving, Stakeholder & Vendor Coordination, User Training & Support, Process Improvement, Record Management, Communication, Time Management

Certifications & Achievements

- Rising Star Award, Janakpuri Vidyapeeth – Samvaad 2023.
- Data Analytics Certification by Geeks for Geeks - Noida
